	45			TOTALS

To ensure students can pursue some depth of study, all students may count up to two (2) courses from the same participating academic program (as indicated by the course prefix) toward a General Education program goal/curriculum requirement.

A student seeking some depth can be compliant with this policy if, for example, they apply both *Chemistry of Air, Water, and Earth* (CHEM100) and *How Drugs Work* (CHEM105) to their Natural World requirement and no other Chemistry course elsewhere in their General Education program.

** Students are required to earn 6 credits in the Citizenship & Responsibility curriculum by completing two (2) of its three (3) goals.

*** Students are required to earn 6 credits in the Creativity & Expression curriculum by completing the Literature goal and one (1) of its other two (2) goals.

e Indicates an elective or option. Students may have some flexibility to choose so long as all of the applicable policies are followed.
